Army	15°C ☀️			5%				10%	5%	80%		Natural, fibre-rich warm weather sock for calf length boots

Sock Materials Used:

Merino wool is the finest wool available and guarantees softness and warmth.

This high-tech sportswear fabric offers you the benefits of Invista's special four channel fibre with a wide surface area that wicks sweat away from your body and keeps you cool, dry and comfortable.

A synthetic fibre that is resistant to abrasion, with great shape retention. Easy to wash and quick drying.

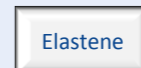

A synthetic fibre that is so lightweight, soft and warm that it is often used as a substitute for wool. It also retains shape and resists shrinkage.

Special hollow fibres provide extra warmth without additional weight and wick moisture away from the

Resistant to abrasions, tears, scuffs and punctures. Rugged durability and lightweight strength.

Synthetic fibre with high tension strength and great shape retention. Guarantees comfort combined with great freedom of movement.

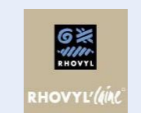

Socks contain a minimal amount of LYCRA® for optimum fit.

Cotton is a cold fibre ideal for warm conditions.

The x-static fibre has a layer of pure silver permanently bonded to its surface. The socks are antimicrobial, anti-odour, cooler in summer and warmer in winter thanks to the heat conductive, anti-static and therapeutic properties.

This fibre provides good thermal insulation, gentle texture and long-lasting comfort with permanent antibacterial effectiveness.

Primaloft fibres are 40% the size of merino wool, offering supreme comfort, warmth, and breathability. The moisture repelling properties pull moisture away from the body, keeping the wearer dry at all times.

Stores excess heat as it's created and releases it as required for optimum comfort.
